CRITERIA (WEIGHT)	EVALUATION	SCORE	WEIGHTED SCORE
-------------------	------------	-------	----------------

Experience with AWS Services S3	<p>The candidate receives a score of 9 out of 10 for the requirement of experience with specific AWS services like Lambda, DynamoDB, CloudWatch, and API Gateway. This high score is justified by the candidate's detailed mention of these technologies in their work experience, indicating a strong familiarity and practical experience. The score is not a perfect 10 as the resume does not provide detailed outcomes or metrics of success related to these technologies, which could have further demonstrated the depth of expertise.</p>	9 / 10	81 / 170
AWS Certified Data Analytics - Specialty	<p>The candidate does not hold the required AWS Certified Data Analytics - Specialty certification, thus failing to meet the specific requirement. The score is set to 1, as the absence of this certification directly contradicts the job requirement.</p>	1 / 10	81 / 170
